MEN'S SPRING SUITS.

The Newest of All.

The more exacting and particular a man may be about exclusiveness in fabrics and pattern, even if he insists on all the advantages he expects from a tailor, then the more threat new antis which we are showing for the first time will appeal to him. He will find in them all the style and midd to have all the style and midd to him would in garments that the best tailors could inside the price and the same as he would pay elsewher for ready-made clothes that would not prove as attained.

Throughout these splendid garments the tailoring will be found to be faultless; it is of the highest character known and if anything a little more exacting, and thorough than is found on the tailor's best productions. And of more importance than all, they peases that we'll bred air, the tailors have a knack of giving to the clothes they turn out.

"The Sign of the Slate"

OLKS believed in signs in Dickens' day. "The Marquis of Granby"-"The Magpie and Stump"-, "Blue Boar" -- Great White Horse"-meant foaming ale, the best of wines, a jolly good meal, and a "bed that was a bed." In fact, the sign in front of an inn, was its most valuable asset.

What the old inn signs meant to travelers years ago, "The Sign of the Slate" means to shoe-buyers of to-day. It swings in front of every "Slater" Shoe Store or Agency, and is a landmark as well as a trademark.

Lots of people-who are not a bit superstitious-believe in "The Sign of the Slate."

### MEN'S SPRING SUITS

The Newest of All.

The more exacting and particular a man may be about exclosiveness in fabrics and pattern, even if he insists on all the advantages he expects from a tallor, these the more these new suits which we are showing for the first time will appeal to him. He will find in them all the skyle and extindation he would in garments that the best tailors could brill to his man the skyle and the skyle s

Throughout these sphendid garments the tailoring will be found to be faultless; it is of the highest character known and if anything a little more exacting and thorough than is found on the tailor's best productions. And of more importance than all, they peases that well-bred air the tailors have a knack of giving to the clothes they turn out.

### BOYS' SPRING SUITS

New arrivals are a daily occurence with this store now. The past week has brought some splerdid additions to our stook of Boys Suita—this week will bring more.

And so the new ones are coming—built a little different banks of the continuary sort—better in every way than you're ever found them before. The Quick & Robertson Quality must be unassatisble.

### MEN'S SPRING SUITS

The Newest of All.

The more exacting and particular s man may be about exclusiveness in fabrics and pattern, even if he insists on all the advantages hevespreas from a stalor, then the more these new suits which was are showing for the first time will appeal to him. He will find in them all the sitys and estisfaction he would in garments that the best ratio manner, though they cost and the sity and estisfaction for measure, though they cost and the price and the sity of the site of the si

Throughout these splending arments the tailoring will be found to be faultiese; it is of the highest character known and if anything allels more exacting and through than is found on the latest production. And of more importance than all they posses that well-bred air, the tailors have a knack of giving to the dothes they turn out.

### Stupidity in children is most often stupidity in choosing their food

White-flow bread, butter and sugar is often thoughtlessly given to children. This trio alone could not support life of three months. They constain practically no element in them which will build mussle, bone, brain, flest or tilsue. The elements which they contain are necessary in food only for the heat and fat they produce. The body cannot live without the nourishment of all its elements, all of which an Infinite Wisdom has placed in exactly right proportions in a single grain of wheat.

The Newest of All.

The more exacting and particular a man may be about exclosiveness in fabrics and pattern, even if he insists on all the advantages he expect from a tallor, then the more these new suits which we are showing for the first time will appeal to him. He will find in them all the style and estimation he would in garments that the best tailors could build to his measure, though they cost a little more than half the tailor's price and the same as he would pay elsewhere for redd-made clothes that would not prove as satisfactory.

Throughout these subsolid organization that including will be a subsolid to the same and the same and

clothes that would not prove as satisfactory.

Throughout these spleading arments the tailoring will be found to be fattliess; it is of the highest character known and it anything a filled more exacting and thorough than is found on the tailor's best coluctions. And of more importance than all they posses that well beed air, the tailors have a knack of giving to the dolthes they turn out.

# MEN'S SPRING SUITS.

The Newest of All.

The more exacting and particular a man may be about exclusiveness in fabrics and pattern, even if he insists on all the advantages he expects from a tailor, then the more these we saits which we are showing for the first time will appeal to him. He will find in them all the style and estification he would in garments that the best tailors could build to his measure, though they cost a little more than half the tailor's price and the same as he would pay disawhere for redd-made clothes that would not prove as satisfactory.

Throubout these ambenities garments that tailoring will be

mothes that would not prove as satisfactory.

Throughout these spheadid garments the tailoring will be found to be faultless; it is of the highest character known and if anythine a little more exacting and thorough than is a considered to the tailor's best productions. And of more importance than the tailor is best productions. And of more importance than the tailor is here productions that the tailors have a knack of giving to the clothes they turn out.

### SPRING JACKET

Our stock of Misses' and Children's Cloth Jackets is row complete for the season. Our buyer personally visited Berlin, Germany the world's great centre of jacket making, and selected the very latest styles in the most fashionable materials,

There will be a great many light cloths and tweed effects worn in separate jackets and we show a particularly choice assortment of these in maids and children's sizes, our stock is better assorted than in any previous spring season.

They are all very moderately priced as they came to us direct. The prices are marked or every garment in plain figures.

### Newest Carpets

We have several special lines in the New Carpets to which we direct your at-tention. We claim for our 65o Tapestrys with borders to match, that they are quite equal to what is usually offered at 75o and 85o a yard. See the aplendid new designs in these.

Templeton's Axminster is a very well made Carpet with the rich effect that can only be had in pile carpets. They cost only the price of a good Brussels and are splen-did to wear. We have their newest patterns.

English and Austrian Floor Rugs from the little door mats to the large room sizes. We have a steadily increasing demand for Rugs as they are becoming very popular each season. We control Templeton's Fine

Axminster Rugs for this district. These have a reputation for richness of appearance as well as durability—Let us show them to you.

### ace Curtain Values

The special values now offered in our Cartain department are made possible by our participation in a purchase of ten thousand pairs. This effected a considerable saving in price which goes to our customers as you will readily see by examining our offerings in the Curtain department.

If you have any Lace Curtain requirements, you will do well to investigate this. No harm to look anyway, and if we do not satisfy you with our values and handsome new patterns, there is no obligation to buy.

It would please us to show them to every Lady in the Bay of Quinte District, whether they buy any or not. Values such as we are able to offer in these Curtains is a good advertisement for us.

### Promptness

Is one of our mottres. To be on a job the very moment we plan for it is sometimes out of the question, and reasonable people understand thatsometimes a delay on a previous job occurs to detain an hour or two, sometimes ball a day, but our work, we wager, is executed as promptly as any other firm of our stamp in Canada.

- So large a staff of workmen and such facilities for promptness and execution and such splenexecution and such splen-did work as we turn out —appeals to our custom-ers. We prove this from repeated calls.

No decorative house in Canada is better pre-pared than curselves to execute superior decor-ative work.—It all rests with you what money you wish to spend, If you care to spend \$1,000 the decorations of your Hall, we can do it for you, We have done it else-

If you want hand decorative work on a drawing-room, coating as much, we have also done that elsewhere and can do it here,

There is no limit to decorative possibilities in our hands.

We're in touch with the first decorations of the land, the finest color-ists, and can secure you New York or Bostonian Ideas if you are prepared for the price.

Our fabrics, our wall papers, our ideas, our workmanship go hand in hand for your pleasure and our profit.

for doing your painting, graining, paperhans in g and decorating. Have the maternia, the ideas, the everything, and we do not make mistakes.

### Promptness

one of our mottoes.

To be on a job the very moment we plan for it is sometimes out of the question, and reasonable people understand that— for sometimes etimes a delay or a previous job occurs to detain an bour or two cometimes half a day, but our work, we wager, is work, we wager, is executed as promptly as any other firm of our stamp in Canada.

So large a staff of workmen and such facilities for promptness and execution and such splen-did work as we turn out

—appeals to our custom-ers. We prove this from repeated calls.

No decorative house in Canada is better pre-pared than ourselves to execute source-tor work.—It all rests with you what money you wish to spend 31,000 on the decorations of your Hall, we can do it for you. We have done it alsewhere.

If you want hand decorative work on a drawing-room, costing as much, we have also done that elsewhere and can do it here,

Wo're, in touch with the first decorations of the land, the finest color-ists, and can secure you New York or Bostonian Ideas if you are prepared for the price.
